

## Lab: Cash Register

Gather the following input values:

- Item to Buy
- How Many
- Cost Per Item

Calculate and print out the Sale Details

- see screenshot of output example

- for now don't worry if your decimal output is not 2 places

```
What would you like to buy? elephants  
How many? 3  
Cost per item? 987.34
```

### Sale Details

```
Item: Elephants  
Amount of elephants: 3  
Cost per elephants: $987.34
```

```
Total so far: $2962.02
```
