

## **Part II: Create the Infographic & Summary**

1. Organize your data and sketch out a plan for your infographic.
2. In your infographic - use text, symbols, illustrations, pictures, maps, diagrams, graphs, charts, and other graphic visuals to relay the results of the information you have gathered
  - you may use any infographic program of your choice - some popular ones are ease.ly, piktochart, and vennage.
3. Post a hyperlink on your blog
  - please make sure this is a hyperlink and not just the URL text on the page...

Include a paragraph on the blog post to let us know the purpose of your survey and what you think the results mean. How will they be used and by who?
