

Spark Movie - Practice Two

Objective: Gain practice using Adobe Spark in order to create effective videos, and create original sound clips using Beat Lab

Spark Movie Practice 2

Tell a short story. Be sure to include the following:

- A movie theme style
- A blank slide (take a picture of plain colored paper)
 - add the title of your movie to it
 - put this at the very beginning of the movie
- Include at least 6 photos or drawings
 - add a caption text to at least one photo (use the layout view for this and choose caption)
- Include at least 3 short video clips
 - try to have someone talking in at least one of the clips
 - spark also lets you trim clips
- Include blank slides for more of the text as needed - make these interesting to look at rather than using a plain white background
- Check the timing of your slides and adjust as needed

- **Audio**
 - create a music file of your own using Beat Lab: <http://www.beatlab.com/>

A few tips:

- If flash is not allowed then enable it
- Try the dice to remix a track and then make your own changes
- When you are happy Save the file
- Then it needs a few minutes to process and you can DOWNLOAD it
- Upload the final .mp3 file from your downloads and use it in your movie
