<u>Website Project</u>

Objectives:

- **To plan and develop a site with a specific purpose**
- **To demonstrate understanding and mastery of the topics covered in this course**

ASSIGNMENT:

You will be creating a website with a purpose. In this case, come up with a product or business idea. Then consider the following questions as you put together your design and ideas.

1. **What will be the title of the website?**

2. **What will it be about?**

3. **Who will be the visiting and using the site?** *(don't say everyone - that is a lame answer - and I don't really think that everyone in the world would have a reason to visit your site - as fabulous as I'm sure it will be)*

4. **What are the main ideas that you will have? Eventually these will become pages of their own but we are starting with just two (main page + one other that you decide on)**

5. **What colors are you considering using?**

6. **What type of logo do you think will look best and how do you plan to put this together?**

7. **What type of images will you use? Where will they come from, how big will they be and how many do you think you will use?**

8. **What will the navigation menu look like?**

9. **What will be the general page layout? Keep the logo and menu the same on each page but the layout can vary. Drawing a picture helps.**
