

Digital Literacy II - Honors Option

To be considered for the honors option you must be a student in good standing, who always uses your time wisely, stays on task, and completes top quality work so far in the course

Honors Project will begin with a written proposal for a project idea - it does not have to be something covered this semester but should involve digital technology in some way. The expectation is that you explore an area of interest to you, using a method that goes beyond what you have already learned in this class.

The project will be added to your Final Portfolio so that you have **four** projects rather than three.
