

## Timeline Project

You will be creating an timeline about a tech topic area of your choice.

To get started create a google doc:

1. Choose a topic
2. Do some research to gather facts
3. Make a list of each fact that includes the following information:
  - a. Start date (mm/dd/yy)
  - b. Title
  - c. Text (not too long)
  - d. A link to an image
  - e. caption for the image
4. There should be at least 6 facts

---

## Topic Ideas

All of these work best if you try to narrow the focus on what you are reporting on to a sub-topic

- for example, it is impossible to cover all of World War II in one timeline, but you can devote time to a particular battle, political meetings, or personality

- tech & ethics
  - privacy issues, data collection, net neutrality, GPS tracking...
- tech & science
  - medical, engineering, environmental...
- tech & history
  - so many to pick from - please avoid guns or bombs...
- tech & finance
  - cryptocurrency, identity theft, Equifax scandal...
- tech & commerce
  - online shopping, advertising, payment platforms...
- tech & security (physical,cyber or legal systems)
  - fingerprint, eye scans, home security systems, 2-step authentication...
- tech & journalism
  - fake news, online news sites, copyright issues...
